KFC BYTE-ATLAS INTERACTION MODEL

The Interaction Model is an holistic view of how the customer goals, as documented in the storymap, are achieved through using related functions and sections of the website and mobile app.

Location, Disposition and Account authentication are the **primary conditions** that determine which menu, reward or promotion a customer will view and therefore be eligible to purchase or redeem.

These **primary conditions** are prompted or accessed throughout the pre-cart journey and can be actioned in any sequence, render partial or complete data sets.

KFC BYTE-ATLAS INTERACTION MODEL

The Interaction Model is a holistic view of how the customer goals, as documented in the storymap, are fulfilled by the underlying app functions and sections of the website and mobile app.

Location, Disposition and Account authentication are the **primary conditions** that determine which menu, reward or promotion a customer will view and therefore be eligible to purchase or redeem.

These **primary conditions** are perceived or accessed in a specific sequence, which means that in some cases any sequence, series partial or complete data sets. Therefore, the Interaction Model is broken down into **Core** Disposition must be set to browse menu.
